European news on corn does coincide

with the steady way in which Argentine is selling corn at New York. There

has been a little rain all over the

southwest and dry weather is regarded as a delayed wheat factor. Wheat

should work a cent lower and this

slowly. Antwerp and Liverpool wheat prices are about at a standstill and

there has not been a valuable new

item in wheat for several weeks. Corn

may work lower, but the decline should not be extended and the market is finally due to repeat the high points

An Unmusical Variation In One of South Dakota-Mostly cloudy tonight Gottschalk's Concerts.

Gottschalk, the planist, was noted for bis enormous physical strength almost Nebraska - Mostly cloudy tonight as much as for his brilliance as a pianist. On one occasion he gave a practical illustration of his strength which, while it did not display his disposition in the most amiable light, undoubtedly afforded him much satisfaction.

He was in concert playing on a plane that was built on a new model, one of the peculiarities of which was that the lip of the keyboard cover projected farther over the keys than in most pianos when the instrument was open for playing. Gottschalk, who was accustomed to throw up his bands to a considerable height during the performance of brilliant passages and was unused to this new form of keyboard, constantly hit his knuckles against the projecting lip.

This repeated rapping of his knuckles at last began to have an irritating effect on him, as the audience could plainly see. Suddenly after a particularly hard rap he stopped short in the middle of his selection, wrenched the offending cover out of the instrument

Japan's Troublesome Volcane.

Sakurajima is one of the volcanoes created, according to the old Japanese calendar, in a single night. A specific date-718 A. D.-has even been assigned for the event, but it is quite evident from its appearance that the cone is really a very ancient one. Sakura jima's form is rugged and weather beaten. Time has furrowed its sides, and the forces of denudation have perceptibly increased the steepness of the upper part of the cone by the removal of all the lighter ejected materials. This circumstance has given rise to the legend that the northern peak of the island-separated from the rest of the summit ridge by a slight depressionis inaccessible. As a matter of fact, it presents no serious difficulty.-London
